**20a. How does the Committee accomplish its purpose?**

The Division supports a wide range of projects aimed at developing and exploring the properties and applications of mathematical structures. Most of these projects represent the research programs of single investigators or small groups of investigators working with graduate students and postdoctoral researchers. The Proposal Review Panels advise on the merits of these special initiative proposals and applications. Approximately 3160 proposals were received in the division this year.

**20b. How does the Committee balance its membership?**

Membership is selected in response to specific proposals and applications to be reviewed. More than 750 individuals served as panelists in FY 18. Members were selected for their demonstrated scientific and engineering expertise so as to represent a reasonable balance of capability in the various subfields of the proposals to be reviewed. Consideration was given to achieving geographic balance and to enhancing representation for women, minority, junior investigators, and persons with disabilities.

**20c. How frequent and relevant are the Committee Meetings?**

Sixty seven meetings were held for continuance of advice on special initiative proposals or applications submitted to NSF for financial support.

**20d. Why can't the advice or information this committee provides be obtained elsewhere?**

While ad hoc mail reviewers can be chosen to give a thorough technical review of a proposal, mail reviewer judgments are normally made about a single proposal viewed in isolation. Panel review in combination with mail review, can, in addition, provide judgments about the comparative merits within a group of proposals or within a single complex, multidisciplinary proposal or a facility.

**20e. Why is it necessary to close and/or partially closed committee meetings?**

Reviewed proposals included information of a proprietary or confidential nature, including

technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals.

## Narrative Description

The NSF mission is set out in the NSF Act of 1950 authorizes and directs the Agency to initiate and support: basic scientific research and research fundamental to the engineering process; and science and engineering education programs at all levels and in all fields of science and engineering. The involvement of knowledgeable peers from outside the Foundation in the review of proposals is the keystone of NSF's proposal review system. Their judgement of the extent to which proposals address the merit review criteria are vital for informing NSF staff and influencing funding recommendations.
